

Under no circumstances should you allow blanket cellular telephone use on aircraft. These annoying devices should be allocated a specific private location for their users. This includes all musical noisy ringing alerts for incoming calls so that they do not interrupt the peace of others sitting around them. Perhaps cell phone and non-cell areas as there used to be smoking and non-smoking.

DO NOT CAUSE THOSE OF US WHO ENJOY THE RELAXING TIME FLYING TO BE FORCED TO ENDURE THE NONSENSE OF PEOPLE WHO HAVE NO CONSIDERATION OF OTHERS.

At the most, I would expect people to quit flying except under extreme emergencies. At the least, I would expect those exposed to this to exercise my right to talk loud and annoy the person on the phone next to me until he or she couldn't carry on a conversation. Use some sense for once ! !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Thank you.
